Cleaning_Log

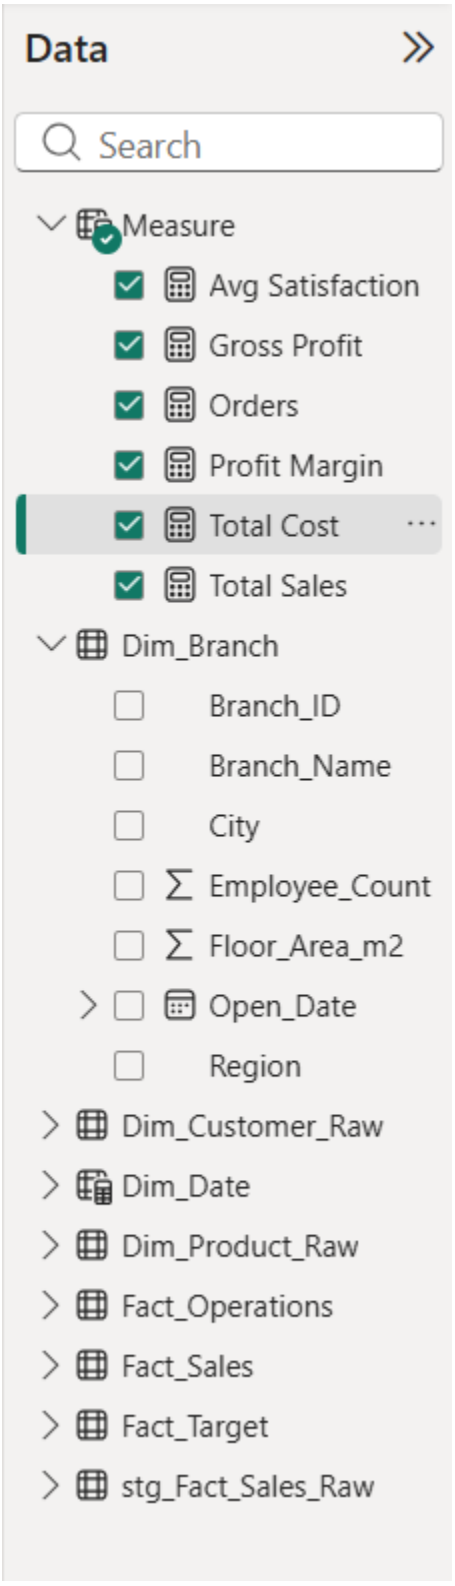

NO	Masalah	Tindakan	Alasan	Dampak
1	Duplikasi Transaction_ID (22 baris duplikat).	Remove Duplicates berdasarkan kolom Transaction_ID di Power Query.	Menghindari perhitungan ganda (double counting) pada transaksi yang sama.	Total Sales dan Orders menjadi akurat (15.712 transaksi), tidak melonjak akibat angka transaksi ganda.
2	Penulisan Channel tidak konsisten (spasi berlebih, variasi huruf kapital seperti " toko ", "ONLINE", "Whatsapp").	Melakukan Trim, Clean, dan pemetaan (Custom Column) menjadi 3 kategori standar: Toko, Online, WhatsApp.	Menyamakan standar penulisan kategori agar agregasi data kanal penjualan valid.	Analisis performa kanal tidak terpecah ke kategori fiktif (kategori konsisten 3 distinct value).
3	Format Transaction_Date bercampur antara dd/MM/yyyy dan yyyy-MM-dd.	Melakukan parsing tanggal menggunakan formula Date.FromText dengan penanganan kultur en-GB dan en-US.	Mencegah error pembacaan tanggal atau kesalahan pertukaran posisi hari dan bulan.	Visualisasi tren bulanan (Sales by Month) dan pengurutan tanggal (Dim_Date) berjalan secara kronologis tanpa error.
4	Teks mata uang pada Unit_Price (mengandung simbol "Rp" dan titik pemisah ribuan).	Menghapus teks "Rp", menghapus titik pemisah ribuan, lalu mengubah tipe data menjadi Decimal Number.	Mengubah data dari tipe text menjadi numerik agar dapat dihitung secara matematis.	Kolom dapat dijumlahkan untuk menghitung Total Sales dan Gross Profit.
5	Format persentase pada Discount_Pct bertipe text (contoh: "7%").	Menghapus simbol "%", membagi angka dengan 100, lalu mengubah tipe data menjadi Decimal Number.	Menyesuaikan standar perhitungan desimal Power BI (7% = 0,07).	Kalkulasi nilai pendapatan bersih (Revenue) dan margin diskon menjadi tepat tanpa error.
6	Nilai kosong (null) pada Satisfaction_Score sebanyak 282 baris.	Membiarkan nilai null tetap kosong dan tidak menggantinya menjadi angka 0.	Angka 0 memiliki arti "sangat tidak puas", sedangkan null berarti "pelanggan tidak mengisi survei".	Nilai Avg Satisfaction tidak terdistorsi menjadi terlalu rendah karena angka 0 fiktif.

Insight Utama

1. Performa Penjualan & Tren Bulanan: Total pendapatan penjualan (Total Sales) mencapai Rp1,435 Miliar dengan Gross Profit sebesar Rp461,46 Juta (Profit Margin 32,15%) dari total 15.712 transaksi. Tren penjualan bulanan menunjukkan fluktuasi musiman yang signifikan, dengan puncak penjualan tertinggi terjadi pada periode pertengahan tahun.
2. Kinerja Cabang Teratas vs Terbawah: Cabang SumbarMart Khatib Sulaiman mencatatkan kontribusi pendapatan tertinggi sebesar Rp285,15 Juta dengan Gross Profit Rp91,54 Juta. Sebaliknya, cabang SumbarMart Solok Kota mencatatkan pendapatan terendah di angka Rp204,48 Juta.
3. Kontribusi Kategori Produk: Kategori Perawatan Diri dan Makanan menjadi pendorong utama keuntungan bisnis dengan kontribusi Gross Profit terbesar, sementara kategori Minuman menghasilkan Gross Profit paling rendah.

Rekomendasi Tindakan (Operasional)

1. Optimization Stok & Promosi Produk: Alokasikan prioritas persediaan stok dan ruang pamer (display) pada kategori ber-margin tinggi seperti Perawatan Diri dan Makanan. Untuk kategori Minuman, lakukan evaluasi strategi penetapan harga (pricing) atau bundel promosi (bundling) untuk meningkatkan volume penjualan.
2. Evaluasi Operasional Cabang: Lakukan peninjauan operasional dan strategi pemasaran khusus pada cabang dengan performa terendah (Solok Kota) agar dapat mendekati efisiensi dan tingkat penjualan cabang utama (Khatib Sulaiman).

Keterbatasan Analisis / Data

1. Sifat Analisis Deskriptif: Analisis yang dilakukan bersifat deskriptif untuk menggambarkan pola historis data, sehingga perubahan tren tidak dapat disimpulkan secara langsung sebagai hubungan sebab-akibat.
2. Kelengkapan Data Kepuasan: Terdapat 282 baris data skor kepuasan pelanggan yang kosong. Meskipun data kosong ini dipertahankan agar tidak merusak perhitungan rata-rata, indikator Avg Satisfaction (4,28) hanya merepresentasikan transaksi yang memiliki respons survei.
